## Post-Partum Perineal Healing Compresses

It's time now to take that extra step to making the healing process after labour quicker, and less painful than you would have ever believed possible...

After much research, we have developed the ideal formula that has been valued by many women across Canada due to its remarkable curative effects; healing the external genital area (the vulva and perineum) and anal area immediately after delivering your baby. This product reduces pain, inflammation, bruising, and hemorrhoids. It also helps prevent infection and accelerates the healing of tears and stitches.

These soothing hygienic pads are saturated with medicinal herbs and oils and are used frozen initially.

We wish you a wonderful birthing experience and a speedy recovery, so that you may better enjoy your precious time with your new baby.

Contact the Naturopathic Doctors below for more information or to place an order.
